

Vinyl tile application

- Your vinyl tiles are made from high quality fade resistant, 3 - 5 year guaranteed vinyl.
- This is a self-adhesive quality vinyl product.
- These quality stickers are covered with a protective lamination to prevent scratches and can be cleaned with a soft cloth.
- Fantastick tile decals are waterproof and adhere to most clean & smooth surfaces.
- Wait at least 2 weeks before applying to newly painted walls.
- This product works best on a SMOOTH surface. We do not recommend sticking them on rough walls.

Preparation: Use a wet cloth to clean your surface. Surface must be clean of all dirt, dust, oil etc! Let your surface dry.

If applying to a tile, measure your tile first, then trim the sticker to get the perfect fit. Gently peel the sticker from the backing paper. Stick onto your smooth surface/tile while softly pushing out the air pockets. After applying wipe design down with a soft cloth.

You're done! If you have any questions, please contact us. We want you to be absolutely delighted with your wall décor!

Removal: When it comes time to remove your vinyl stickers, remember that the heat of a hair dryer will help soften the vinyl. This makes it easier to remove. Then simply clean your surface with household cleaner or alcohol.

Tips

- **Use a hair dryer when applying and removing the vinyl, especially in cold weather. The heat makes the glue stick & release better.**
- Fantastick does not recommend using our products on Rhinolited walls and/or dry-walling as this will damage the paint once the vinyls are removed.
